you must try it!

The Starlite 85 looks and sounds like a motor half its size. Yet it's out-performers of higher ratings. This compact package has remarkable performance and operating economy. The low-silhouette design is due to Evinrude's V-4 engine. Its 85 horses will pull a pack of skiers and leave bigger engines in its wake. Tests have shown that the Starlite 85 will actually equal the performance of 120 hp stern drive engine on the same boat. We're anxious to show it to you. But you must try it to believe it.

## Jus' Ramblin'

BY LUCILE K. WOODHAM McRAE

GEORGE WALLACE in selecting Gen. Curtis E. LeMay as his running mate has had mixed emotions. Some are real excited about it and think that LeMay is a real boom to the Wallace ticket. Some supporters of the Wallace movement are scared to death, thinking that if they are elected enemies of the United States will not wait for us to drop "the bomb" but will drop them on us first.

Some wonder why LeMay, who is a hero indeed, has allowed himself to be put in the position he is now in with the possibility that it will damage his "image." Since that first short talk LeMay has been muzzled by the Wallace camp and many are wondering just how long that will be allowed since LeMay is not used to such tactics. He has always been "the boss," Wallace has been "the boss" so it could be like two cooks in the same kitchen.

But so far as we can see around us here it has done no damage nor any good. It is George Wallace that the people of this area want. The running mate does not matter - Remember, whoever is elected president - their running mate may end up being 'the president.'

THE LATEST POLLS places Nixon way out front but that has happened before and things went haywire. But according to the looks of things it will be a close race. Right now it is Richard M. Nixon for a country mile. But there is the possibility that Humphrey will yet surge forward and be elected president.

I am not supporting Humphrey for president but I remember a couple of months ago seeing him on the Tonight Show and he was just about the most interesting and the cutest person I have seen on that show. He was a different person to what I had ever seen from a political standpoint so he may not be so bad after all.

He was just an average human being that night and even looked different. I enjoyed his being on the show.

ILL BE VOTING for Richard Nixon for president as I have told you already. I believe that he will correct some of the things that sure need improving and that things will be quiet different under his leadership to what it has been for the past eight years or more.

But this is Wallace Country so I'm not making a big to-do about the election. I will not be guilty of attempting to force my views on anyone as some have attempted to do to me. I do encourage you to vote for a man who brings the best out of us and not the worst.

FOR EDUCATION there is a great possibility that Alabama will have another cent added to the sales tax. That would make 7 cents on the dollar paid in some places and few places with less than 5 percent sales tax to pay. Shoppers are already having

to pay 6 percent in many places in Alabama. Not only is there a possibility that the sales tax will be increased in Alabama, according to news releases this week, but an increase in the State Income Tax, along with every thing else that is already taxable.

I don't know where it is going to end but something has got to break. Instead of increasing taxes they must be decreased or people can't survive, pay the tax and their families live even worse.

I realize that schools have got to have more money in order to try to get up off the bottom of the pile from an education standpoint. Alabama is at the very bottom in education and Alabama has had more murders during the past eight years than any other state in the union. But even so there are good people living in Alabama and our children are getting an education if they are willing to work hard for it. Many errors have been made in Alabama but if we try hard enough there is a possibility that we will overcome them eventually, though it will take many years.

I HAVE RECEIVED some seed of the wild canella that I will plant to see if they come up. Lee Barlow brought me several plants last Spring and I put out in my big garden and they grew some during the summer. He brought us these seed and we will see what they do.

Mrs. Hobson Yarn brought me a plant that lived and that I was proud to get. I have forgotten the name of it but Joe Johnston had brought us in some of the fruit of this kind of plant last year. I found where a plant had volunteered and was growing in my garden when clearing it so it was left to grow.

But at this time I have not seen any blooms or fruit on my two plants. I'm hoping the wild canella will bloom next Spring. The plants are several years old and may have a few blooms next year.

DR. R. J. MCCREARY in Elba presented me with a couple of buckeye balls last week. He said that every now and then I am supposed to take them out and rub my fingers over them and they will bring us good luck. He said he harvested them at "high noon" on Friday 13 in Escambia County on the LeMay-McCreary plantation on the bank of the Suwannee River near the mule graveyard. Dr. McCreary said all buckeye balls are good but that "these are better."

Anyhow I am keeping up with these buckeye balls and I'll be able to tell you if there is anything to that business of good luck. I have already nearly worn these buckeye balls out rubbing them for good luck.

The buckeye tree is said to be so handsome and rapid of growth that in spite of a very disagreeable odor exhaled by the bark and leaves, it has been adopted as an ornamental shade tree in all sections where it will grow. The trees are unusually tall with slender branches, and the broad five-fingered leaves grow in umbrella-like clusters, shading the tree with dark luxuriant foliage. The buckeye tree grows wild in certain parts of the southern states.

The buckeye balls are also called horse chestnuts. They look sorts like chestnuts. The buckeye is thought to have poisonous seeds and leaves. Most of the species have bitter flavored seeds and have but if these balls can bring me good luck it won't matter how bitter they are.

I have never seen a buckeye tree but I am curious now to see them. So far as I know there are no buckeye trees in this area but if so will someone please tell me where they are.

## Local Girl Represents Rucker Handicapped

Although she is a deaf mute, a 20-year-old brunette from Elba, holds a job as clerk-typist in the Department of Publications and Nonresident Instruction at Ft. Rucker.

Miss Linda Tice also is one of approximately 17,000 physically handicapped persons the federal government has averaged employing annually in recent years. At Ft. Rucker, two per cent of the civilian work force are handicapped employees. These figures were revealed in connection with the observance of the National Employ the Handicapped Week Oct. 6 through 12.

Linda, the older of two daughters of Mr. and Mrs. Jimmie E. Tice of Route 1, Elba, was five months old when she had a serious illness. Doctors believe this illness caused Linda to become handicapped.

After attending the Elba High School and the Zion Chapel School at Jack, Ala., Linda entered the Alabama School for the Deaf at Talladega, Ala., in September 1962. During six years there she chose typing for her vocational training.

Linda, whose favorite course was algebra, described the Talladega school as similar to a college. It had dormitories, a classroom, a library, and some 500 male and female students. In November of her last year there, Linda was the school's homecoming queen.

On July 16, Linda's first job was at the Army Aviation Digest in the Department of Publications and Nonresident Instruction at Ft. Rucker. Her duties were to type original drafts of articles submitted for publication in the magazine. Her progress has been rapid and her duties now include typing the final copies.

According to her supervisor, Miss Linda McCowen of Geneva, "With her positive outlook and attitude, Linda constantly shows a willingness to accept all her assignments." Miss McCowen adds, "She is a hard worker and has an outstanding attendance record."

Linda's case is just one of many which proves that handicapped employees have excellent job attendance and morale in addition to their performance as employees which equals or exceeds that of the non-handicapped.

"Success is just around the corner—only sometimes it's a long block."

## TAILGATING CAUSES WRECKS

Tailgating -- following too closely the car ahead of you -- is a car length for cause for rear-end collisions that often spell tragic accidents on our congested high-speed highways.

What makes this type of accident so senseless is that it can be so easily prevented.

To avoid rear-end collisions, the American Insurance Association suggests this simple driving rule:

A safe following distance is a car length for each 10 miles an hour you are driving. If you are traveling 40 miles an hour, for example, 72 feet would be a reasonable following distance.

With nearly 17 million traffic mishaps reported in the United States last year, that resulted in 53,000 fatalities, one just can't drive too carefully, the association states.

## You have all weekend to take advantage of the phone company.

Anytime on Saturday and Sunday, you can call anywhere in the country for a dollar.

If you've ever called long distance during the day, you probably know it's more expensive than calling after 7 p.m. and all day Saturday and Sunday.

So you can understand why some people feel they're getting a deal when they call long distance at night. But in the evening, our office is more like a ghost town than anything else. Since running a ghost town is a losing proposition, we decided to run what you might call a sale on long distance calls. And that's when you can take advantage of us.

In fact, you can call anybody, anywhere in the country for a dollar or less.

Obviously, opportunity doesn't knock but once. It knocks after 7 p.m. And all day Saturday and Sunday.

**FIRE HURTS**  
"Fire is something that happens to the other fellow, maybe, but not to me." A lot of folks think this way and dismiss fire and its destructive potential in this casual way. Did you know that in the United States more than 800,000 homes are destroyed by fire, bringing death to 6,500 a lot of these young people. I hope that each Coffee County citizen won't gamble and can escape the financial headaches or family heartbreaks that fire inevitably brings. Make fire prevention your business, too. Remember, fire hurts.

### LIME AND SOIL FERTILITY

I was happy to appear last week on the Gene Ragan television program stressing the importance of rotations in high peanut yields. Everybody agrees — research folks and farmers, too, that peanuts need to be fertilized in advance. For example, on land that you will put in corn next year and peanuts the following year, why not send in a soil sample now and ask for recommendations for the corn in 1969 and the

peanuts in 1970? Coffee County farmers lead the 17-county district in the number of soil samples sent to the laboratory last year and we were second in the state. Let's keep our lead in this important work.

### PLANTING BULBS

Unfortunately, I don't keep up with bulbs and flowers like I need to and a lot of times I come up short. I am interested in looking into the possibilities of locating industries within the borders of the county. Four of us plan to appear on the "Auburn Today" program on Saturday, October 19, at 12:30 p.m. to discuss these possibilities in a 30-minute television program. I have invited Chamber of Commerce President John Lester, City Councilman Roy Shoffner, and the County Extension Council President Brown Bryars to give some of their views concerning what the people in Coffee County can do to bring about badly needed expansion.

### RECREATION

Some of the statisticians tell us that if we live long enough, we will be able to enjoy long hours of leisure in the years ahead. A lot of folks wonder what they will be doing with their free time and are making plans to develop interests

is things of a recreational nature.

The Elba Rotary Club is going to hear a specialist from our Auburn University staff talk about recreational opportunities in the Wiregrass. Specialist Robert Clark will discuss things that can be done now that will be helpful to a lot of people even 25 years from now. Dan Presley and I plan to hear him speak to the Rotary Club on Monday, October 14, in Elba.

### RURAL INDUSTRIES

City officials all over Coffee County are interested in bringing in new industries to the county and they are also interested in expanding the ones that we already have. Some of our city officials are especially interested in looking into the possibilities of locating industries within the borders of the county.

### FORESTRY

A lot of Coffee County people have pine trees that were planted 10 or 12 years ago. Many of them want to know about whether to do a partial thinning or whether to clear cut and start over again and about management problems. Easy, simple answers come readily, because each situation is different. We plan to have Extension Forester Larkin Wade with us on Monday, October 28, to meet with some interested landowners concerning operations that are open to them at the present time. We already have some people who have appointments with him, but if you would like some help get in touch with me.

### Battle Flag Presented To U.S.S. Alabama

The Battle Flag of the U.S.S. Alabama, the proud battleship now moored in Mobile Bay, has been presented by Dr. Frank A. Rose, university president, to the U.S.S. Battleship Commission. The war scarred flag was originally given to the University by the Department of the Navy in 1946 and has been kept in the Library's archive room. It was a contribution from Alabama's everywhere including quarters and dollars from public school children that helped raise the one million dollar fund necessary to move the ship from drydock in Seattle to Mobile Bay.

The battleship saw action first in the North Atlantic during early months of W.W. II and then gained 9 battle stars when shifted to service in the Pacific.

### Wildlife Cards On Sale

New membership cards for the Wildlife Association at Ft. Rucker are on sale at the Wildlife area at Lake Thlocco. Effective until Sept. 16, 1969, the membership card may be obtained by military personnel and dependents, temporary duty personnel, and civilians. Members of the Wildlife Association have many privileges, including a restaurant, hunting and fishing equipment and bait. There also is a zoo, archery range and picnic area. In addition, members can sign out boats.

Military persons on active duty are not required to have an Alabama state fishing or hunting license. Dependent members 16 years of age and older and civilians must have a state hunting and fishing license.

KINSTON 4-H boys show their awards they received for 4-H Club work. Roderick Rainey, front, receives the trophy for having the best club record. Other 4-H'ers receiving awards are, left to right, Ronnie Weeks, Mike Wise, Terry Wayne Kelley and Jackie Chancey. Mrs. Donie Moody serves as 4-H local leader for this club.

KINSTON 4-H'ers receive awards for outstanding 4-H Club work. Brenda Sutley receives a trophy for having the outstanding record book in the girls 4-H Club and Dennis Weatherford receives the trophy for having the outstanding record book in the boys 4-H Club. Others receiving awards are left to right, Jimmy Taylor, Melody Whigham, Beverly Pierce, and Wanda Maloy.

You can make  
\$44 a head  
this winter

Agricultural authorities report that feeder steers weighing 450 to 500 pounds, grazed on small grain at a stocking rate of one steer per acre, should gain about 300 pounds in 150 days, at a cost of approximately \$40. If you buy feeders at 28¢ a pound and even sell them at the same price—the 300-pound weight gain equals \$84 per animal! Your profit is \$44 or more per head.

### FOLLOW THESE TIPS

- (1) Select calves capable of making fast gains—preferably good or choice.
- (2) Use recommended amounts of lime and mixed fertilizer, based on soil tests. Apply at planting time or just before.
- (3) Use certified seed.
- (4) Apply recommended amounts of nitrogen at planting time and top dress with an equal amount of nitrogen in February or March.

For more details on profitable winter grazing, see the experienced folks at your Big Boy Headquarters. They offer a complete program tailor-made for farms in this area.

- Big Boy Fertilizer—standards and grades or prescription blended with extra nitrogen added to save you one top dressing.
- AMMO-NITE® Nitrogen—solutions or prilled.
- Lime
- Certified seed
- Custom applications
- Free estimates
- Anhydrous ammonia
- Soil testing service
- Weed control chemicals
- Equipment rental

### Advertising... makes wheels go 'round!

Every day, in great cities and small villages, housewives make out their daily shopping lists from ads in their home-town newspapers.

No hoopla, no balhyoo. The kids have gone to school, the father to work. The mother—the family money—sits down at her kitchen table and carefully decides where she can get the best buys. The information is all there, in the newspaper. The bargain prices, the descriptions, stay there while she makes up her mind, at leisure. Perhaps she will even fold the ad and put it in her purse, if there is any question in her mind about the price or the product.

Advertising is a service which people want. After the New York newspaper strike of 1967, women interviewed in one study said they missed ads most of all features in the newspaper.

Advertising makes the wheels go 'round in our economy. Following the Minneapolis newspaper strike in 1962, economists of the Federal Reserve Bank's Ninth District estimated that the area had lost \$58,000,000 in sales. Advertising makes newspaper wheels go 'round, too. Before the advent of mass advertising, newspapers—always very expensive to produce—had depended on political parties for support. It has been advertising, honest advertising furnishing a needed service to millions of consumers, that has strengthened the economic base of the American press.

## COFFEE NEWS & CHAT

BY SARA E. HUTCHINSON

The Federal Trade Commission is taking a tougher stand on mailers who try to collect for or recover merchandise sent to persons who did not request it.

Reacting to growing consumer annoyance with the practice, the FTC has issued a ruling which can set a pattern for future cases. According to the FTC, bills, invoices, reminders, letters or notices of a philatelic company must state "clearly and conspicuously" that the merchandise is for sale to persons who did not request it.

GRASS. In the past, horticulturists recommended leaving grass clippings on the lawn to add additional humus to the soil, but heavy grass clippings tend to smother lawns by heating. They also contribute to the problem of thatching which gradually builds up through the season.

Extension Horticulturist Ronald Shumack suggests using a grass catcher or lawn sweeper to remove clippings after each mowing. Then put those clippings on the compost pile to rot and produce humus for your lawn and garden.

SHADES. A new glass fiber window shade which can keep a room as much as 50 per cent cooler in summer and warmer in winter is making its debut on the market.

The cloth is tightly woven and vinyl-coated with a texture similar to duck fabric. It has an interlining of Milium which serves as the insulator, and the new shade is sanitized to cut down growth of bacteria, mold and mildew. Available in white or tan, it also provides semipaque light control.

The new window shade is flameproof, resists wrinkles and can be easily cleaned with a damp, sudsy cloth. Sizes run 70 inches wide and six feet long.

PATTERNS. The fashion pattern industry has set up a new scale of standard measurements to make pattern sizes more closely correspond to the sizes of ready-made garments. For example, if you wear a size 12 dress, it is hoped your pattern size will also be size 12. Of course, to correspond, the dress must be made by the exact seam allowance stated on the pattern.

New pattern measurement charts appear in all pattern catalogues or may be obtained from your local pattern store.

Most likely, short remnants are not labeled as to fiber content or instructions for care. In such cases the decision to buy will rest on previous experience with similar fabrics, information the store personnel can give and report from others who have used some of the same material.

What seamstress doesn't enjoy visiting a mill-end store and finding low priced remnants of cloth not usually seen on the regular market? She still needs to know the fiber content of the fabric she buys.
